Summary of Employment, Demographics, and Commuting Patterns for St. Lucie County, Florida

May 2022

Contents

Labor Shed Analysis

A labor shed analysis is defined as where workers work and where workers live relative to a user-defined selection area. This analysis helps to determine where a labor market draws its commuting workers. Labor shed studies can draw comparisons between various geographies including state, Congressional District, Metropolitan Statistical Area (MSA), county, Workforce Investment Area (WIA), Zip Code, and Census tract. By indicating how many of the selection area workers work outside the area, labor sheds can help identify potential pools of workers who would be available for work in the user-defined area.

Labor shed studies provide economic developers and existing or prospective employers a tool to understand the local labor market and make informed expansion and site selection decisions. In addition, labor shed studies can help indicate potential impacts from environmental, social, or economic incidents.

OnTheMap, Census Bureau

OnTheMap is a mapping and reporting tool developed by the U.S. Census Bureau showing employment and home locations of workers with companion reports for user-defined areas. It is the first synthetic data product released by the Census Bureau. OnTheMap is an important tool for Florida to perform labor inflow/outflow analyses and provide commuting data to planning and economic development agencies as well as Regional Workforce Boards. OnTheMap data is also used by the Department of Economic Opportunity to help quantify natural disaster impacts for emergency management agencies based on where workers live and where they work.

OnTheMap integrates existing data from state-supplied administrative records on workers and employers with existing federal censuses, surveys, and other administrative records. The state Labor Market Information (LMI) agencies supply key data from unemployment wage records and from businesses each quarter. The Census Bureau merges the state-supplied data with current demographic information to produce the data found in OnTheMap. By combining data from different administrative sources, censuses, and surveys, the Census Bureau produces local employment information that was not previously available.

Florida Department of Economic Opportunity, Bureau of Workforce Statistics and Economic Research (WSER)

The Florida Department of Economic Opportunity, Bureau of Workforce Statistics and Economic Research (WSER), produces, analyzes, and distributes labor statistics to improve economic decision making. These data are produced as part of the federal/state cooperative statistical program with the U.S. Department of Labor, Bureau of Labor Statistics, and the Employment and Training Administration.

Executive Summary

The analysis of workforce and demographic characteristics, including commuting patterns of St. Lucie County was conducted to provide economic data on the population and labor force living or working in the county. The report is useful for detailing where workers work and live in order to align resources. This report includes population, labor force, and demographics for St. Lucie County.

Workers employed in St. Lucie County are clustered in the Health Care and Social Assistance (15.1%), and Retail Trade (13.1%) industries. Workers living in St. Lucie County are concentrated in the Health Care and Social Assistance (16.4%), and Retail Trade (13.2%) industries.

A detailed examination of commuting patterns for St. Lucie County shows that the county has a net outflow of -40,188 workers. Using the latest annual Census data available, there were 75,117 workers employed in St. Lucie County and 115,305 workers living in St. Lucie County. Of the workers who lived in the county, 70,841 workers (61.4%) were employed outside the county.

With 61.4% of workers who reside in St. Lucie County employed outside the county, St. Lucie County was ranked 33 of 67 for the highest outflow rankings among Florida counties. Leon County (20.7%) had the highest outflow rate, followed by Miami-Dade County (21.4%) and Duval County (24.9%). Glades County (84.2%), Jefferson County (81.7%), and Gilchrist County (80.0%) had the lowest worker outflow rates.

Of the 70,841 St. Lucie County workers employed outside the county, the top destination counties are Martin County (19,797 workers), Palm Beach County (15,457 workers), and Indian River County (6,269 workers). Of the 30,653 St. Lucie County workers living outside the county, the top origin counties are Martin County (5,169 workers), Indian River County (4,834 workers), and Palm Beach County (3,927 workers).
